

# Machine seam roof, Kindergarten 900 m<sup>2</sup> | Helsinki

## Description

Niitty, a kindergarten in the city of Helsinki, was coated with ElaProof S according to the manufacturer's instructions twice. This ensured a minimum dry film thickness of 0.6 mm in terms of waterproofing.

## Information

In connection with the coating work, the holes caused by removing the old snow barriers were patched with ElaProof H and Base fabric. In addition, the vertical seams of the long miters were treated in the same way. The ventilation of the roof was improved with vacuum fans hand-made by a sheet metal worker. After the coating work new snow barriers, roof bridges and ladders were installed.
