

Coating of CLT Sauna bench

Description

The steps of the sauna's CLT benches were first treated with ElaProof Primer, and then coated with ElaProof+SAND Floor Covering. On top of that, ELACOAT TopCoat was applied, which makes it easier to keep the area clean. Tikkurila's Supi Sauna Wax was used for treating the seating area.

Project information

Client: Rental site

Project: Sauna bench (steps)

Material: Cross-laminated timber - CLT
